# LANDSCAPE SERVICE

**M**ANY years' experience and natural fondness for the work have given us special skill in planning effective gardens and artificial landscape planting. To accomplish satisfactory results from landscaping, one must know the characteristics of plants, such as height, time of flowering, color, ultimate size, and adaption to shade, soil, and exposure. We grow practically all the planting material used in our landscape work and know how the different kinds of nursery stock will develop in the soils and climate of this section. This practical knowledge enables us to produce gardens and landscapes that grow into a permanent place of beauty.

We are always glad to submit plans and estimates for any work of this sort, whether it is large or small. This service is rendered free and without obligation, except where elaborate plans and special trips are necessary, in which case a small fee is charged.

If you have any difficulty with plants, lawns, trees, or flowers, we are always glad to make a personal call, within reasonable distance, to give advice.

With prices for nursery stock at their present low level, it is a propitious time to rearrange perennial borders, design rose-gardens, and make evergreen plantings. Let us submit plans now without any obligation on your part and show you what can be done with very little expense. We will be glad to make appointments with you at your home at any time.

## TIME TO PLANT

Plant Perennials from April 1 to June 1 and September 1 to November 15.

Plant Roses from March 15 to May 15 and October 15 to December 1.

Plant Peonies and Irises from September 1 to frost.

For late planting in the spring, we carry field-grown perennials and plants in pots.

**DELIVERY.** Unless otherwise instructed, we will ship all orders to arrive at proper planting-time. Postage prepaid when cash accompanies order.

**TERMS.** If you desire to open a charge account, please send bank or trade references with order.

**VISITORS WELCOME.** We shall be very glad to see you if you are in the vicinity of our Nursery and will be glad to show you over the grounds and point out the quality of our stock.

# HARDY PERENNIALS and ROCK-PLANTS

These old-fashioned, hardy flowers have won an important place in the gardens of most flower-lovers because of their varied formation and gorgeous range of color. Year after year they are among the first flowers to greet us in the spring, with renewed vigor after the winter rest, and the last flowers to leave us in the fall.

Considering the countrywide trend toward economy, the perennial garden, in the long run, is the most economical garden to plant because

once planted it eliminates the expense of replanting every year. Many varieties are useful as cut-flowers. They need very little care outside of weeding and cultivation. After the first hard frost, cut the tops down and cover with a good coat of well-rotted manure.

Plants of the following varieties are fine, strong, nursery-grown stock, with the exception of a few that are best transplanted from pots, and will bloom abundantly this year.

Six plants of one variety at dozen rate; 25 at 100 rate

**R** following the name of a plant indicates that it is suitable for the rock-garden; **R\*** that it is large enough to be grown on the edge of the hardy border as well as in the rock-garden

# STRONG DELPHINIUM PLANTS

**Selected Plants.** From thousands of wonderful hybrids growing in our fields each year we select a limited number of the very finest types in separate shades of

LIGHT BLUE  
DARK BLUE

LAVENDER  
PURPLE

Each one of these plants has been carefully chosen when in flower because of its unusual merit. Your choice of the above colors,

**\$1 each, \$10 per doz., \$75 per 100**

**Assorted Plants.** This grade includes the regular run of the field, covering the entire color-range but not marked for color or type.

**50 cts. each, \$5 per doz., \$35 per 100**

**Potted Plants.** We also have young plants in 3-inch pots for very late spring sales after field-grown plants are too far advanced to be transplanted. Although they will not produce as many flower-spikes as the field-grown plants the first year, they will flower the latter part of the summer.

**35 cts. each, \$3.50 per doz., \$25 per 100**

□□

**WE** HAVE developed these beautiful perennial flowers into one of our most important specialties. Neither time, patience, nor expense has been spared to bring them to their present state of perfection. These greatly improved hybrids produce numerous massive and stately spikes 5 to 6 feet high, bearing large, double and semi-double flowers of perfect form throughout one-half to two-thirds their entire length. The colors range from palest blue to deepest indigo and from most delicate mauve to glowing royal purple, passing through innumerable intermediary pastel shades of bewildering richness and variety.

Our keenest desire is to have you grow these lovely things in your garden. They will stand comparison with any Delphiniums in the country.

□□

## *Prize-Winners*

**O**UR Delphinium Hybrids have been consistent winners of prizes at all the shows where they have been exhibited. They have become so well known because of their outstanding size and

formation that we often hear people remark at the shows, when we are arranging our exhibit, "Those must be Turner Bros.," even before name-cards are placed.

It is very gratifying to continually receive letters from customers telling us of prizes they have won for blooms produced from our Delphinium plants. The illustration at the side of the page is a reproduction of a spike grown at our Nursery, and is typical of what our strain produces. The unusually fine range of color, perfect form, and enormous size of these Hybrids have been achieved by years of careful study and selection of seed.

Delphiniums grow nicely in many different kinds of soils, but they especially like a heavy clay loam. When planting, use one small handful of a good organic fertilizer, such as Driconure, and one of a good commercial fertilizer to each plant. Incorporate these well with the soil in each hole before placing the plant. The field-grown clumps should be planted so that the crown is barely covered with soil. Young pot-plants should be planted so that the ball is covered about one-half inch with soil.

Delphiniums like plenty of water. During dry spells, water thoroughly at least once a week. An occasional light sprinkling in the evening, after a hot day, is very beneficial. Always keep the ground well cultivated to a depth of about 2 inches. If the lateral growths on each spike are removed, the individual flowers will be larger.

## Aster • Michaelmas Daisy

LILIAN

MORGENROOD

DAILY SKETCH

## THREE BEAUTIFUL NEW PHLOXES

**MORGENROOD.** A pleasing new variety producing great heads of extra-large, bright rose-red florets with a much deeper eye. This is a midseason Phlox, growing 2½ to 3 feet high, with fine foliage. It is very prolific and we feel sure you will like it. 35 cts. each, \$3.50 per doz.

**LILIAN.** An outstanding variety with large heads, or trusses, of quite large florets, soft cameo-pink with a faint blue eye. Although of only medium height, the plants are sturdy, with unusually healthy foliage, and bloom over a longer period than almost any other variety. 25 cts. each, \$2.50 per doz.

**DAILY SKETCH.** This European introduction is claimed to be one of the most important novelties of recent years. Extra-large trusses and individual flowers of light salmon-pink, with a faint carmine eye. The plants are strong and should reach 3 feet in good soil. 35 cts. each, \$3.50 per doz.

ASTER FRIKARTI, Wonder of Staefa

One of the finest of recent novelties is this Swiss Aster, which makes a broad bushy plant and produces scores of lovely fragrant, pale violet-blue daisies from August until frost. The flowers last a long time when cut. 50 cts. each, \$5 per doz.

JAPANESE IRIS

To many people the Japanese Iris (*Iris Kaempferi*) are the most beautiful of the whole family. The flowers are large—some of the newer varieties unbelievably so—and whether single or double, they are all lovely. They do well in any good garden soil, but require lots of water, especially near bloom-time. 35 cts. each, \$3.50 per doz.

ASTER, RED ROVER

The fall Asters, or Michaelmas Daisies as they are often called, are among the finest of autumn flowers both in the garden and for cutting. Red Rover is the first of these Asters that could really be called red, and is a fine addition. 35 cts. each, \$3.50 per doz.

Hardy Phlox, Enchantress

# The Best Novelties

All the Roses on these two pages are varieties which we can heartily recommend. There are a few of the latest novelties, but most of them are varieties which have had thorough trials and are distinct both in quality and beauty of their splendid flowers and in the reliability of the plant. Anyone can succeed with this collection.

**EDITH NELLIE PERKINS.** 75c. each

With Edith Nellie Perkins, Mme. Cochet-Cochet, and Comtesse Vandal, we offer you the very best of the fancy pink shades. Splendidly formed flowers, on extra-good plants.

**SOEUR THÉRÈSE. 75c. each**

**GOLDEN DAWN. 75c. each**

**DICKSONS CENTENNIAL. \$2 each**  
Plant Patent No. 223

Dicksons Centennial and Signora are two of the finest of this year's novelties. Dicksons Centennial is a differently formed flower, being more like a Japanese peony than an ordinary Hybrid Tea Rose. The color and fragrance are outstanding. Signora is one of the best cut-flowers of all.

**McGREDY'S SCARLET. 75c. each**

# HARDY PERENNIAL COLLECTIONS

These two Collections of Perennials are made up of fine, strong, dependable plants that will flower the first season after they are planted. Each Collection is a complete hardy garden, consisting of plants of various heights, colors, and flowering periods, which will insure a profusion of bloom throughout the season. Either is a splendid investment that will bring returns in ever-increasing plant and floral delights each season for years to come.

Azalea amœna in foundation planting

INDIAN SUMMER

## KOREAN HYBRID CHRYSANTHEMUMS

These glorious Chrysanthemums are the result of crossing the very hardy Korean Chrysanthemum with the regular garden Chrysanthemums. The resulting hybrids are much hardier than ordinary varieties and bring new tints and shades in splendid, single-type flowers, so satisfactory for cutting. In addition to these desirable qualities, the new hybrids are sweetly scented, with fragrance comparable to those found in modern roses.

**INDIAN SUMMER.** Vivid, glowing orange that immediately captures attention. The large flower, 3 inches across, is somewhat shaggy but altogether attractive and distinct in form. Growth is erect and sturdy, never requiring support of any kind. It fills the need perfectly for a late-flowering Chrysanthemum that will not be marred or destroyed by late October frosts. Oct. 15. 2 to 2½ ft. 50 cts. each, \$5 per doz.

**THE MOOR.** Here is an introduction that has been greatly admired by many who fancy this particular color, best described as amaranth-purple or port-wine-red. It is noted for its intensity and brilliance in the garden. Flowers 3 inches in diameter, fully double, produced freely, and excellent for cutting. Very hardy. In full flower in late September. 2 ft. Received Award of Merit at the Boston Orchid Show, October, 1936. 75 cts. each, \$7.50 per doz.

**KING MIDAS.** In profusion of flowers there is no double hardy Chrysanthemum comparable to this lovely new comer. The plants are literally covered with bloom for a very long period, from late September throughout October. Flowers average 4 inches in diameter, fully double, a charming shade of soft yellow with the faintest bronze tintings appearing occasionally. Blends perfectly with almost any other shade and is very effective in itself. Very branchy, attaining an average height of 2½ feet. We recommend it without hesitation. Very hardy. 75 cts. each, \$7.50 per doz.

**EMBER.** This is a remarkably hardy and rugged Chrysanthemum which apparently withstands all weather conditions. It is a brilliant glowing bronze that stands out conspicuously among others of this color—a combination of coral and orange shades that cannot be described accurately, ever changing with the light, but always compelling. The bloom is not too double, and of excellent form, 2½ inches in diameter. Flowering in mid-October, it will be particularly desirable if a midseason variety is wanted. The flowers are quite frost-resistant. 2½ ft. 75 cts. each, \$7.50 per doz.

KING MIDAS

EMBER

**SATURN.** Three-inch, single flowers, delightfully fragrant, of brilliant sparkling orange and bronze, with a soft orange halo surrounding the golden center. A gorgeous Chrysanthemum. 3 ft. Oct. 5. 35 cts. each, \$3.50 per doz.

**VENUS.** Rhodanth-pink, a new shade in Chrysanthemums. Possibly it would be more understandable if we said lilac-pink shaded with rose-lavender. Flowers 2½ inches across, with three or four rows of petals, coming into bloom in late September and lasting for a long period. 2½ ft. 35 cts. each, \$3.50 per doz.

**APHRODITE.** Mound-like plants simply covered with 3-inch flowers of soft pink, changing to ivory-white with a pinkish tint as the blooms develop. It is one of the most free-blooming Chrysanthemums we have ever seen, and the single flowers are splendid for cutting as well as for garden ornament. 2 ft. Early Oct. 35 cts. each, \$3.50 per doz.

## Bedding Plants

We carry a full line of Bedding Plants suitable for cut-flowers, bedding, and window-boxes. We offer these principally for customers within delivery distance for our trucks. It is not advisable to ship annuals.

## Annual Plants

All our Annuals are strong, healthy plants potted in individual pots. These potted Annuals produce better results than ordinary plants from flats because the roots are not disturbed when transplanted. Annuals may be planted any time after May 15. We carry a large variety of Annuals and Annual vines including all the latest novelties, many of which will be of great assistance to the perennial border.

Annual price-list sent on request.

Have you ever grown Turner's Delphiniums? They are the finest grown, with immense spikes of large flowers of all shades.

## EVERGREENS

The planting of Evergreens about the home is one of the finest investments one can make. They increase in value and beauty each year as they grow into larger and finer specimens. There is nothing to equal the Evergreens for adding warmth, color, and background to the home and grounds. We are always glad to submit estimates for landscaping on request.

The following prices are for exceptionally fine, bushy, well-shaped trees, dug with a generous amount of soil and burlapped. You will find that our Evergreens measure well up to each size. Many of these varieties are fine for rockery work.

**PINUS MONTANA MUGHUS**

**THUJA OCCIDENTALIS PYRAMIDALIS**

Columnar form of the popular Arborvitae particularly suitable for accent planting, for framing doorways or windows, and to produce avenue effects along garden walks.

# HYBRID TEA OR EVERBLOOMING ROSES

These are the most popular of all Roses because of their ever-blooming habit and variety of color. We have always made a special effort to deliver extra-fine, strong, budded plants direct to the customer from our nursery where they are grown. This insures fresh, vigorous plants that will thrive and bring much joy and satisfaction to the grower. It has been very gratifying to receive many favorable comments regarding the type of Rose plants we have delivered to satisfied customers in the past.

Roses like a deep bed of about 12 to 14 inches of good soil, with well-decayed manure spaded in. Set bushes 1½ to 2 feet apart, placing them so that the junction of branches and root is just covered with soil. All classes of Roses should be pruned back severely to about 6 to 8 inches when planted.

Protect Hybrid Teas in the winter by hilling the soil up around the plants and covering with a litter of strawy manure or leaves. Be sure to remove this early in spring.

Extra-strong plants, \$7.50 per doz., \$50 per 100, except where noted
